ANCA RUXANDRA RĂDULESCU
Associate Professor
Department of Mathematics, SUNY New Paltz
Address: 1 Hawk Dr., New Paltz, NY 12561
Email: **radulesa@newpaltz.edu**

EDUCATION

Degree	Date Received	Institution and Location	Major Field
B.S.	1998	University of Bucharest, Romania	Mathematics
Ph.D.	2005	Stony Brook University	Mathematics

EMPLOYMENT

Year	Rank	Institution and Location	Title
2020-present	Associate Professor	Mathematics, SUNY New Paltz	Associate Professor
2014-2020	Assistant Professor	Mathematics, SUNY New Paltz	Assistant Professor
2010-2014	Instructor	Mathematics, CU Boulder	Instructor
2009-2010	Assistant Professor Adjunct	Psychology, CU Boulder	Assistant Professor Adjunct
2009-2010	Postdoctoral fellow	Bioengineering, Stony Brook	Senior postdoc fellow
2006-2009	Instructor	Applied Mathematics, CU Boulder	Instructor
2005-2006	Visiting Assistant Professor	Mathematics, CUNY, Brooklyn College	Visiting Assistant Professor
2005	Postdoctoral fellow	Bioengineering, Stony Brook	Postdoctoral fellow
2004	Summer intern	Cold Spring Harbor Laboratory	Research intern
1998-2005	Graduate student	Mathematics, SUNY Stony Brook	Teaching Assistant

AWARDS AND GRANTS

EXTERNAL AWARDS AND GRANTS

National Research Experience for Undergraduates Program (NREUP): The mathematics of incorporating human behaviour in epidemic modeling. PI: Rădulescu; co-I Cohen. Funding source: Mathematical Association of America. Award period: 06/2023-07/2023. Amount: $ 35,262 for PI and student support (four undergraduate students recruited from racially underrepresented groups).

SUNY Chancellor's Award for Excellence in Scholarship and Creative Activities, 2022. System-wide award, recognizing consistently superior research achievements and pursuit of excellence.

MSRI Summer Research Program for Women in Mathematics: "Mathematical models of retina metabolism, implications for pathology and treatment." Participants: A. Aparicio, E. T. Camacho, A. Dobreva, K. Larippa, A. Rădulescu, D. Schmidt, I. Trejo. Funding source: Mathematical Sciences Research Institute. Award period: two-week MSRI summer visit, 07/2020 (postponed to remote collaboration in Fall 2021, due to COVID 19 closures). Amount: **$16,275** for collaborative activities; **$7,000** for post visit travel.

Workshop in Mathematics, Division of Analysis: "North Eastern Analysis Meeting, NEAM 2018." PIs: Rădulescu, Isralowitz, Mayeli. Funding source: National Science Foundation. Award Period: 10/01/2018-09/31/2019. Amount: **$24,000.**

Collaboration Grant for Mathematicians: "*Dynamic neural networks and applications to modeling brain function.*" PI: Rădulescu. Funding source: Simons Foundation. Award period: 09/2017-08/2022. Amount: **$42,000.**

Best Paper Award (with mentee Simone Evans), North-Eastern Regional Conference on Complex Systems, 2019: "*Universality of the Configuration-Dynamics Relationship in Nonlinear Networks.*" Amount: **$2,000** (fee waiver for invited submission to the journal *Complexity*).

Collaborative Research Travel Grant: "*A dynamical system approach to brain profiling in schizophrenia, based on imaging data.*" PI: Rădulescu. Funding source: Burroughs Wellcome Fund. Award period: 06/01/2011 – 08/31/2012. Amount: **$ 9,403**.

Schizophrenia Research Society Travel Fellowship. Funding source: Schizophrenia Research Society. Award period: 2010. Amount: **$1,000**.

Association of Women in Mathematics Travel Award. Funding source: Association of Women in Mathematics. Award period: 2008. Amount: **$2,000**.

INTERNAL AWARDS AND GRANTS

Discretionary Salary Increase. Funding source: SUNY. Award period: 2017, 2018, 2019, 2020.

Discretionary Salary Award. Funding source: SUNY. Award period: 2016.

AC^2 Summer Research Program: "*Are our brains fractals, and why should we care?*" Funding source: AC^2. Award period: 05/2022-06/2022. Amount: **$1,750** for each of the three students (125 hours of work); **$3000** for faculty mentor; **$400** for supplies.

Summer Undergraduate Research Experience: "*Synchronization and clustering in realistic reticular thalamic nuclei architectures.*" Funding source: New Paltz RSCA. Award period: 06/2022-08/2022. Amount: **$3,400** stipend for the student (280 hours of work); **$1,200** stipend for the faculty mentor and research support.

AC^2 Summer Research Program: "*Comparative evolution of COVID-19 effect in the US states.*" Funding source: AC^2. Award period: 05/2021-06/2021. Amount: **$1,785** for each of the three students (125 hours of work); **$2150** for faculty mentor; **$400** for supplies.

AC^2 Summer Research Program: "*Dynamic Trends in the COVID 19 Outbreak in New York Counties.*" Funding source: AC^2. Award period: 05/2020-06/2020. Amount: **$1,300** for each of the three students (100 hours of work); **$2000** for faculty mentor; **$400** for supplies.

Summer Undergraduate Research Experience: "*Using data-driven dynamic networks to model the course of the COVID 19 outbreak.*" Funding source: New Paltz RSCA. Award period: 06/2020-08/2020. Amount: **$3,304** stipend for the student (280 hours of work); **$1,200** stipend for the faculty mentor; up to **$1,000** in research support.

CPD scholarship award for participation in the SUNY RF program: "*Grants and Proposals: If you write it, they will fund!*" Funding Source: SUNY. Award period: 06/2020. Amount: **$225**.

Research and Creative Projects Award: "*Using a network model of the striatum to understand hyperactivity patterns in obsessive compulsive disorder.*" Funding source: SUNY New Paltz, Office of the Provost. Award period: 05/2019–12/2019. Amount: **$1,350** for student support.

Annual Mentor Award 2017. Source: New Paltz RSCA. Amount: **$500** (travel support).

Research and Creative Projects Award: "Complex Dynamics Networks." Funding source: SUNY New Paltz, Office of the Provost. Award period: 09/2016–12/2017. Amount: **$2,000** for student support.

Summer Undergraduate Research Experience: "Fractal properties of hybrid Mandelbrot sets." Funding source: New Paltz RSCA. Award period: 06/2016-08/2016. Amount: **$3,400** stipend for the student (280 hours of work); **$1,200** stipend for the faculty mentor and research support.

Seed grant: "Student assistant support for mentored sustainability research." Funding source: SUNY New Paltz Sustainability Research Fund. Award period: 2017-2018. Amount: **$1,000** for student support.

Seed grant: "Sustainability course development." Funding source: SUNY New Paltz Sustainability Research Fund. Award period: 05/2017-08/2017. Amount: **$500**.

Provost Challenge grant: "Using nonlinear dynamics to model brain dysregulation in schizophrenia." Funding source: SUNY New Paltz, Office of the Provost. Award period: 09/2016–12/2017. Amount: **$5,996** (used for one course release and travel).

University of Colorado Arts and Sciences Fund for Excellence Award. Source of support: Office of the Dean, University of Colorado. Award period: 2013. Amount: **$500**.

"Woman Who Makes a Difference" Award. Source: University of Colorado Women Resource Center. Period: 2012.

INVITED TALKS

Mathematical Modeling of Retinal Degeneration: Aerobic Glycolysis in a Single Cone, Joint Mathematics Meetings, January 2023.

Using mathematical modeling to understand the COVID 19 epidemic dynamics, keynote at the Symposium for Undergraduate Mathematics Research, New Paltz, September 2022.

Synchronization and clustering in complex quadratic networks, AWM Symposium, June 2022.

Architecture-dependent bifurcations and clustering in brain networks. National Institute of Standards and Technology, Applied and Computational Mathematics Division Seminar Series, April 2021.

Management strategies in a SEIR-type model of COVID-19 community spread, Joint Mathematics Meetings, Virtual Meeting, January 2021. Presentation delivered by mentee Reed Williams.

Graph theory, dynamics, and how to classify brains. Mathematics Department, New Mexico Tech. January 2020.

Graph theory, dynamics, and how to classify brains. Theoretical Biology Seminar. Penn State University. February 2020.

Dynamic networks, theory and applications. Mathematics Department. Fairfield University, February 2020.

Graphs, fractals and how to classify brains. Mathematics Department. Fairfield University, February 2020.

A network model of the striatum captures hyperactivity patterns in obsessive compulsive disorder, Society for Mathematical Biology Annual Meeting, Montreal, July 2019.

Asymptotic sets in networks of coupled quadratic nodes, Midwestern Dynamics Seminar, Minneapolis, November 2018.

Nonlinear network dynamics under perturbations of the underlying graph, Mathematics Department Colloquium, Vassar College, May 2017.

Dynamics in templates & networks of complex quadratic maps. Center for Collective Dynamics of Complex Systems, SUNY Binghamton, October 2016.

Nonlinear coupled dynamics in neural network models, Scimemi Laboratory, Biology Department, SUNY Albany, June 2016.

Dynamic networks and templates: from hardwiring to temporal behavior, Mathematics Department Colloquium, University of Colorado at Colorado Springs, 2015.

Dynamic networks and templates: from hardwiring to temporal behavior, Applied Mathematics Colloquium, University of Colorado at Boulder, 2015.

Real and complex dynamics for symbolic sequences of logistic maps, Mathematics Department Colloquium, University of Colorado at Boulder, 2014.

Bifurcations and entropy of dynamical systems, Laboratory for Computational Neurodiagnosis, Stony Brook University, 2014.

Measuring complexity of dynamical systems, Mathematics Department Colloquium, New Paltz, 2014.

Mathematical simultaneous modeling of network connectivity and dynamics, Metron Scientific Solutions Inc., Richmond, 2014.

Network coupling dynamics and emotional responses, Applied Mathematics Colloquium, Colorado School of Mines, 2013.

Density and geometry in a system of coupled nonlinear oscillators, Kopell group, Boston University, 2013

Density and geometry in a system of coupled nonlinear oscillators, Martinos Imaging Center, Harvard University, Boston, 2013.

Mathematical modeling of neural dynamics, Mind Research Network, University of New Mexico, 2013.

A firing rate model of bursting in neuronal populations, Mathematics, Arizona State University, 2009.

Entropy of interval maps and connected isentropes, Mathematics Colloquium, CU Boulder, 2009.

Dynamic brain parameter profiling in schizophrenia, Institute of Cognitive Sciences Colloquium, CU Boulder, 2009.

The multiple personality of schizophrenia, Mathematics Colloquium, Colorado Springs, 2008.

A dynamics model of schizophrenia, Kopell group, Boston University, 2007.

Complexity, entropy computability and a model of schizophrenia, CUNY Graduate Center, 2006.

Topological entropy in a space of quartic polynomials, Applied Mathematics, CU Boulder, 2006.

A formal versus a clinical model of cognition, Psychology Department, CU Boulder, 2006.

Mathematical models in Neuroscience. Analytical and computational challenges, Mathematics/Computer Science workshop, Lehman College, 2006.

On entropy of quartic polynomials, Stevens Institute of Technology, Hoboken, 2003.

CONFERENCE PRESENTATIONS

The Mandelbrot set for networks, templates and mutated systems, Joint Mathematics Meetings, January 2023.

Effects of local mutations in quadratic iterations, Biology and Medicine through Mathematics, May 2022.

Estimating glutamate transporter surface density in mouse hippocampal astrocytes, Biology and Medicine through Mathematics, May 2022.

Estimating glutamate transporter surface density in mouse hippocampal astrocytes, Joint Mathematics Meeting, April 2022.

Template iterations and hybrid Mandelbrot sets, Joint Mathematics Meeting, April 2022.

Complex dynamics in templates and mutated systems, Joint Mathematics Meeting, April 2022.

Estimating glutamate transporter surface density in mouse hippocampal astrocytes, Society for Mathematics Biology Annual Meeting, Virtual, June 2021.

Complex dynamics in networks, templates and mutated systems, Fourth Northeast Regional Conference on Complex Systems, Virtual, April 2021.

Effects of local mutations in quadratic iterations. Virtual poster presentation. Society for Mathematical Biology Annual Meeting. Virtual Edition. August 2020.

Predicting dynamics from connectivity patterns in networks of canonical neural oscillators. Virtual poster presentation. International Conference on Mathematical Neuroscience. Digital Edition. July 2020.

A pharmacokinetic model of lead-calcium interactions. Biology and Medicine through Mathematics. (Accepted oral presentation; event canceled due to COVID 19 restrictions.) Virginia Commonwealth University. May 2020.

Effects of local mutations in quadratic iterations. Biology and Medicine through Mathematics. (Accepted poster presentation; event canceled due to COVID 19 restrictions.) Virginia Commonwealth University. May 2020.

Geometry-based estimates of glutamate transporter density in astrocytes. Biology and Medicine through Mathematics. (Accepted poster presentation; event canceled due to COVID 19 restrictions.) Virginia Commonwealth University. May 2020.

Predicting dynamics from connectivity patterns in networks of canonical neural oscillators, Dynamics Days 2020. Trinity College, Hartford. January 2020.

Effects of local mutations in quadratic iterations (delivered by mentee Abe Longbotham), Dynamics Days 2020. Trinity College, Hartford. January 2020.

Predicting dynamics from hardwiring in canonical low-dimensional coupled networks, International Conference in Mathematical Neuroscience, Copenhagen, June 2019.

Bifurcation analysis of a photoreceptor interaction model for Retinitis Pigmentosa, International Conference in Mathematical Neuroscience, Copenhagen, June 2019.

Geometry-based estimates of glutamate transporter density in astrocytes, International Conference in Mathematical Neuroscience, Copenhagen, June 2019.

A Pharmacokinetic Model of Lead-Calcium Interactions, Society for Applied and Industrial Mathematics Meeting, Snowbird, May 2019.

Template Iterations of Quadratic Maps and Hybrid Mandelbrot Sets, Society for Applied and Industrial Mathematics Meeting, Snowbird, May 2019.

Predicting dynamics from hardwiring in canonical low-dimensional coupled networks, Biology and Medicine through Mathematics, Virginia Commonwealth University, Richmond, May 2019.

Bifurcation analysis of a photoreceptor interaction model for Retinitis Pigmentosa, Biology and Medicine through Mathematics, Virginia Commonwealth University, Richmond, May 2019.

A pharmacokinetic model of lead absorption and calcium competitive dynamics, Biology and Medicine through Mathematics, Virginia Commonwealth University, Richmond, May 2019.

Template iterations of quadratic maps and hybrid Mandelbrot sets, Joint Mathematics Meetings, Baltimore, January 2019.

Asymptotic sets in networks of coupled quadratic nodes, Dynamics Days, Evanston, January 2019.

Global and local excitation and inhibition shape the network dynamics for the control of movement and reward, International Conference in Mathematical Neuroscience, Juan-les-Pins, June 2018.

Dynamic networks with complex discrete nodes, International Conference in Mathematical Neuroscience, Juan-les-Pins, June 2018.

Global and local excitation and inhibition shape the network dynamics for the control of movement and reward, Biology and Medicine through Mathematics, Virginia Commonwealth University, May 2018.

Effects of configuration on ensemble dynamics in a network of Wilson-Cowan nodes, Biology and Medicine through Mathematics, Virginia Commonwealth University, Richmond, May 2018.

Nonlinear network dynamics under perturbations of the underlying graph, Northeast Regional Conference on Complex Dynamics, Binghamton, April 2018.

Global and local excitation and inhibition shape the network dynamics for the control of movement and reward, Computational and Systems Neuroscience, Denver, March 2018.

A mathematical model of coupled excitation and inhibition in a neuronal network for movement and reward. Joint Mathematics Meeting, San Diego, January 2018.

Asymptotic dynamics in networks of complex quadratic maps. Dynamics Days, Denver, January 2018.

Balancing excitation and inhibition shapes the dynamics of a neuronal network for movement and reward. Society for Neuroscience 47th Annual Meeting, Washington DC, November 2017.

Template iterations of quadratic maps and hybrid Mandelbrot sets. Second Northeastern Analysis Meeting, Albany, October 2017.

Balancing excitation and inhibition shapes the dynamics of a neuronal network for movement and reward. Annual Meeting of the Society for Neuroscience Hudson-Berkshire Chapter, Albany, October 2017.

Template iterations of quadratic maps and hybrid Mandelbrot sets. 23rd International Conference on Difference Equations and Applications, University of West Timisoara, Romania, July 2017.

Nonlinear network dynamics under perturbations of the underlying graph. The Second Malta Conference in Graph Theory and Combinatorics, University of Malta, Qawra, June 2017.

Balanced excitation and inhibition shapes the dynamics of a neuronal network for movement and reward. Biology and Medicine through Mathematics, Virginia Commonwealth University, May 2017.

Applying fMRI complexity analyses to the single-subject: a case study for proposed neurodiagnostics. Biology and Medicine through Mathematics, Virginia Commonwealth University, May 2017.

Effects of configuration on ensemble dynamics in a Wilson-Cowan network. International Conference on Mathematical Neuroscience, Boulder, May 2017.

Real and complex behavior for networks of coupled logistic maps. Dynamics Days 2017, Silver Spring, January 2017.

Invited talk: *Extensions of the Mandelbrot set for templates and networks of quadratic maps.* North-Eastern Analysis Meeting, SUNY College at Brockport, October 2016.

Real and complex behavior for networks of coupled quadratic maps. SIAM Annual Meeting, Boston, July 2016.

Wilson-Cowan coupled dynamics in a model of the cortico-striato-thalamo-cortical circuit. Biology and Medicine through Mathematics, Virginia Commonwealth University, Richmond, May 2016.

Dynamics in template and networks of complex quadratic maps. Joint American Mathematical Society Meetings, Seattle, January 2016.

Dynamic templates and networks: from hardwiring to temporal behavior. XXXV Dynamics Days, Duke University, January 2016.

Real and complex dynamics for symbolic sequences of logistic maps. Midwest Dynamics Seminar, Ohio State University, October 2015.

Dynamic networks: from connectivity to temporal behavior. The 8th Congress of Romanian Mathematicians, Iasi, Romania, June 2015.

Real and complex dynamics for symbolic sequences of logistic maps. Institute of Mathematical Sciences XXV, Stony Brook University, May 2015.

Julia sets for dynamic templates. Spuyten Duyvil Undergraduate Mathematics Conference, Manhattan College, April 2015.

Invited talk: *Dynamic networks: from connectivity to temporal behavior.* AWM Research Symposium, University of Maryland, College Park, April 2015.

Using dynamical systems methods to measure stress resilience. Cell Symposia: Translational Neurosicence, Arlington, October 2014.

Effects of connectivity on dynamic behavior in neural networks. Joint AMS Meetings, Baltimore, 2014.

Network coupling, dynamics and emotional responses. Cell Symposia – The Networked Brain (SFN satellite meeting), San Diego, 2013.

Network connectivity modulates power spectrum scale invariance. Butcher Symposium, CU BioFrontiers Institute, Westminster, Colorado, 2013.

Network connectivity modulates power spectrum scale invariance. The Coleman Institute Annual Conference, Westminster, Colorado, 2013.

Neural network function – density, geometry and dynamics, American Mathematical Society Joint International Meeting, Alba Iulia, Romania, 2013.

Neural network function – density or geometry? Workshop on Rhythms and Oscillations, Mathematical Biosciences Institute, Ohio State, 2013.

Neural network function – density or geometry? Dynamics Days, Denver, 2013.

Network connectivity modulates power spectrum scale invariance. The Coleman Institute Annual Conference, Westminster, Colorado, 2012.

A connectivity model explains why fMRI power spectral signatures discriminate among individuals based on anxiety levels. Butcher Symposium, Biofrontiers Institute, CU Boulder, 2011.

A connectivity model explains why fMRI power spectral signatures discriminate among individuals' anxiety levels. The Coleman Institute Annual Conference, Westminster, Colorado, 2011.

A mathematical model of schizophrenia. CIMBposium, Bridging Disciplines: Interdisciplinary Bioscience, CU Boulder, 2010.

Frequency spectra of fMRI time series identify prefrontal dysregulation in schizophrenia. The Coleman Institute Annual Conference, Westminster, Colorado, 2010.

Power spectrum scale invariance identifies prefrontal dysregulation in paranoid schizophrenia. Schizophrenia International Research Society Conference, Florence, 2010.

Dynamic brain parameter profiling in mental illness, 6th Annual World Congress for Brain Mapping and Image Guided Therapy, Harvard Medical Center, 2009.

Dynamic brain parameter profiling, Advances in Low-dimensional Dynamics, Stony Brook, 2009.

A systems approach to schizophrenia, Coleman Institute Annual Meeting, Boulder, 2008.

Brain dynamics and mental illness, Dynamical systems in physiological modeling, Purdue University, 2008.

Bifurcations in a schizophrenia model, Schizophrenia International Research Society, Venice, 2008.

The psychology of oral assessments, Ideas and Issues in Calculus Instruction, Denver, 2008.

A systems approach to schizophrenia, International Conference on Complex Systems, Boston, 2007.

Schizophrenia – a parameters' game?, Coleman Institute Annual Meeting, Westminster, Colorado, 2007.

A systems approach to schizophrenia, 8th International Conference on Systems Biology, Long Beach, 2007.

A systems approach to schizophrenia, Mt. Sinai International Congress on Schizophrenia Research, Colorado Springs, 2007.

Hebbian inspecificity in unsupervised learning, Comp. and Systems Neuroscience, Salt Lake City, 2007.

A generalized algorithm of unsupervised learning, 4th Annual Bioinformatics Meeting, Snowmass, 2006.

Mathematics of schizophrenia, Coleman Institute Annual Meeting, Broomfield, Colorado, 2006.

Lyapunov stability for Oja's rule of unsupervised learning, Prodyn, Göttingen, 2001.

SEMINAR PRESENTATIONS

Complex dynamics in networks, templates and mutated systems, Complex Dynamics Seminar, CUNY Graduate Center, 2022.

Architecture-dependent bifurcations and clustering in brain networks, Mathematics Colloquium, Ithaca College, 2021.

Fractals: an exploration of mathematics in art, College Hall, SUNY New Paltz, 2016.

Iterations of interval maps and Sarkovskii's Theorem, Mathematics Department, SUNY New Paltz, 2014.

Network coupling dynamics and emotional responses, Mathematics Colloquium, CU Boulder, 2013.

Does connectivity dictate dynamics in neural networks?, Dynamics seminar, Boulder, 2012.

The dynamics of the brain – from toy models to real data. Math Club presentation, Boulder, 2010.

A firing-rate model of bursting in neural populations, Dynamics seminar, Boulder, 2009.

Is schizophrenia more than one person?, Dynamics seminar, Boulder, 2008.

A model of emotional dysregulation, UC Health Science Center, Denver, 2008.

A systems approach to schizophrenia, Applied Mathematics Colloquium, Boulder, 2008.

A dynamical systems model of schizophrenia, Psychology seminar, Boulder, 2007.

A time-series analysis of complexity and attractor dimension, Dynamics seminar, Boulder, 2007.

Is topological entropy computable?, Dynamics seminar, Boulder, 2006.

The mathematical brain, Complex analysis seminar, CUNY Graduate Center, 2005.

On entropy of polynomials, Complex analysis seminar, CUNY Graduate Center, 2005.

Bones and topological entropy for quartic polynomials, Dynamics seminar, Stony Brook, 2004.

A rigidity theorem for real polynomials, minicourse, Stony Brook, 2004.

The dynamics of learning, Graduate student seminar, Stony Brook, 2004.

The Connected Isentrope Conjecture for polynomials, minicourse, Dynamics seminar, Stony Brook, 2003.

On the entropy and monotonicity of real polynomials, minicourse, Dynamics seminar, Stony Brook, 2003.

SERVICE ACTIVITIES

Service to the Mathematics Department

Department Search Committee member. General search, one tenure line, 2021-2022.

Department Reappointment, Promotion Tenure Subcommittee member, 2021-2022.

Chair of Department Reappointment, Promotion Tenure Subcommittee, five dossiers, 2020-2021.

Department Search Committee member. General search, two tenure lines, 2019-2020.

Department Reappointment, Promotion Tenure Subcommittee member, 2019-2020.

Department Discretionary Salary Awards Subcommittee member, 2019.

Department Search Committee member. Algebra and Geometry search, two tenure lines, 2018.

Department Reappointment, Promotion Tenure Subcommittee member, 2018.

Department Discretionary Salary Awards Subcommittee member, 2015.

Open House Department representative, Spring sessions, 2017-2019.

Department meeting recording secretary, Fall 2018, Fall 2021.

Service to the College

Presidential Search Committee member, September 2021-March 2022.

Discretionary Salary Increase Central Committee member, September 2021-May 2022.

Grant preparation group member for NSF S-STEM, December 2020-ongoing.

Calc I prep instructor for the AC^2 Diversity Program (2021).

Diversity panel member for AC^2 students: Getting Excellent Letters of Recommendation (2021).

PI for NSF proposal and primary organizer of the North Eastern Analysis Meeting, New Paltz, November 2018 (with co-PIs Izralowitz and Mayeli).

Sustainability Committee fellow 2016-present. Awarded seed grant for course development in mathematical modeling of sustainability. Awarded seed grant for mentored project on modeling developmental effects of lead from contaminated water in children.

Core leadership team member on New Paltz application for the Howard Hughes Medical Institute Award in support of Inclusive Excellence across STEM disciplines (2015-2016 and 2019-present).

Co-organizer of the Spuyten Duyvil Undergraduate Mathematics Conference (primary organizer: Francis Valiquette), SUNY New Paltz, April 2016.

Faculty co-advisor for Women in Science and Engineering New Paltz Chapter, 2014-2015, and 2021-ongoing.

Faculty mentor for undergraduate research, 2014-present (received Research, Scholarship and Creative Activities 2017 Mentor Award). The resulting publications with students are shown as " mentored research" in the publication list. Mentored students include:

- Students mentored through RSCA: Ariel Pignatelli (2014-2016), Rachel Marra, Brandee Williams (2016); Simone Evans (2018-2019); Tucker Lundgren (2018-2019); Reed Williams (2018-2020); Abraham Longbotham (2019); Kieran Cavanagh, Yan Lok Ko, Danae Evans (2021).
- Students mentored through Provost Challenge Grant, and through Research and Creative Projects Awards: Caitlin Kennedy, Joanna Herron, Samantha Wyler, Ariel Pignatelli (2015-2016); Kelsey Butera, Simone Evans (2017); Kieran Cavanagh, Hayley Collucio (2019); Yan Lok Ko (2020).
- Students mentored through AC^2 summer program: Samir Bah, Warren Wilson (2017); Kaitlyn Gonzalez, Johnathan Linton, Shelah Ballard (2020); Tatiana Alonso, Johanna Sanchez, Norman Read (2021); Amani-Dasia Augustin, Anthony Cooper (2022).
- Students mentored through Sustainability Committee seed grant: Matt Chason (2017); Tucker Lundgren (2018).
- Students mentored through New Paltz Foundation summer scholarship: Simone Evans (2017); Danae Evans (2021).
- Students mentored through the Honors Program: Simone Evans (2018); Monika Morasse (2021).

M.S. thesis advisor: Reed Williams, Computer Science, SUNY New Paltz (2022): *Mapping gender to a spectrum through biological and societal lenses*.

Honors thesis major advisor and committee member: Monika Morasse, Mathematics, SUNY New Paltz (2021): *Water contamination in an energy balance model of climate with coupled iceline*.

Honors thesis major advisor and committee member: Simone Evans, Mathematics, SUNY New Paltz (2019): *Asymptotic sets in networks of coupled quadratic nodes*.

Senior project advisor and dissertation committee member: Lucas Benney, Physics, SUNY New Paltz (2015): *Carbon footprint triggered bifurcations in an energy balance model of climate*.

Honors thesis external committee member: Emily Hannon, Ecology and Evolutionary Biology, CU Boulder (2015): *Endohelminths from avian hosts in the San Francisco Bay Area of California*.

Mentor for student teams participating in the COMAP Interdisciplinary Contest in Modeling (2015-2018).

Faculty member of the CU Mathematics Department Diversity Committee, awarded the University of Colorado Diversity and Excellence Grant, 2013-2014.

Undergraduate Research Opportunity mentor and graduate research advisor at CU Boulder on dynamical systems and mathematical neuroscience, 2006-2014.

Freshman Calculus Course and Oral Assessments Coordinator, 2006-2009.

Letter provider for over a hundred peers and students, supporting academic and professional advancement.

Service to the profession

Panel reviewer for the National Science Foundation, March 2022.

Guest editor for a special issue of the MDPI journal *Mathematics*, to appear in 2022.

External Ph.D. defense committee member for Danielle Brager, Mathematics Department, Arizona State University: *Modeling and Analyzing the Progression of Retinitis Pigmentosa*, June 2020.

External Ph.D. defense committee member for Bryan Goldberg, Mathematics Department, University at Albany: *Geometric and dynamical properties of the infinite dihedral group*, May 2019.

Society for Mathematical Biology mentor (for students Arpit Swain and Ordono Vil), July 2020.

Project co-leader for a team of six investigators, via the Women Advancing Mathematical Biology program on "Approaches to Complex and Heterogeneous Systems," June 2019. This five day workshop, organized by the AWM at the Institute for Pure and Applied Mathematics at UCLA, was aimed at enhancing collaborations and mentoring between women in applied mathematics (joint work to be submitted for publication in October 2019). Previous participant as a team member in a prior edition of the workshop on "Understanding Complex Biological Systems with Mathematics," Mathematics Biosciences Institute, May 2017.

Proposal reviewer for the Simons Foundation, Collaborative Awards for Mathematicians, 2019.

Panel reviewer for the National Science Foundation, March 2018 and 2022.

Reviewer for scientific proposals for Oak Ridge Associated Universities, 2015-2022.

Faculty mentor for the Association for Women in Mathematics (research activities organizing, collaborative and mentoring network building between women in pure and applied mathematics). Mentor and student poster judge at the Joint Mathematics Meetings AWM and MAA sessions.

Active member of an NSF-funded work-group for course and program development in neurosicence and math biology. Participated in the startup summer workshop at University of Missouri, May 2016, and in follow-up teleconferences thereafter.

Co-organizer and Chair of the dynamical systems session at the North-Eastern Analysis Meeting, October 2016. Chair of the dynamical systems session at the WIMIN meeting, Center for Women in Mathematics, Smith College, September 2016. Session chair at the International Conference on Mathematical Neuroscience, Boulder, May 2017. Session chair at the Second Malta Conference in Graph Theory and Combinatorics, Qawra, June 2017.

Editorial Board member for Nature Scientific Reports (2017-present).

Guest editor for an issue of MDPI Mathematics (2022).

Journal reviewer for PloS One, Nature Scientific Reports, Physica A and D, Entropy, Journal of Theoretical Biology, Nonlinear Dynamics, Mathematics and Computers in Simulation, Journal of Physics Communications, Schizophrenia Research, Schizophrenia Bulletin. Cenference reviewer for the Northeast Regional Conference on Complex Dynamics (2018-2021), for the National Conference on Undergraduate Research Proceedings (2016) and for the International Multi-Conference on Complexity, Informatics and Cybernetics (2010-2015).

Book reviewer for Mathematics Review (2019) and for Elsevier (2008-present).

Service to the community / outreach

Published four papers on mathematical modeling and data analysis of the COVID 19 epidemic, 2020/2021.

Published one paper on environmental and health impacts of lead contamination, 2019.

Co-organizer of the Ultimate Math Monsters, a community mathematics program for elementary school kids (2020).

Consultant for the New Paltz Drama Department in the production of *Mad Forest*, Fall 2016.

Faculty advisor for the UNICEF at CU Campus Initiative, 2011-2014.

Performed the mathematical analysis and participated in the filming of an episode of the Discovery Channel TV show "Curiosity," 2009.

Volunteer mathematics tutor for *Attention Homes* teen shelter, 2008.

WORKS IN PROGRESS

1. A. Rădulescu, J. Nakuci, S. Evans, S. Muldoon. *Computing brain networks with complex dynamics.* **Mentored research.** Under review. Preprint: arXiv:2209.05268.

2. A. Rădulescu, M. Anderson, 2022. *Gap junctions and synchronization clusters in Thalamic Reticular Nuclei.* **Mentored research.** Under review. Preprint: arXiv:2209.00384.

3. A. Rădulescu, T. Alonso, N. Reid, J. Sanchez, 2021. *State-dependent patterns and coupling between the vaccination schedule, population mobility and the COVID epidemic outline, in the US states.* **Mentored research.** Under review. Preprint: MedRx doi.org/10.1101/2021.07.18.21260708.

4. A. Rădulescu, D. Evans, A-D. Augustin, A. Cooper, J. Nakuci, S. Muldoon. *Synchronization and clustering in complex quadratic networks.* **Mentored research.** Under review. Preprint: arXiv:2205.02390.

5. A. Rădulescu, A. Longbotham, A. Collier. *Effects of local mutations in quadratic iterations.* **Mentored research.** Preprint: arXiv:2011.14002.

6. A. Rădulescu, M. Morasse. *Water contamination in an energy balance model of climate with coupled iceline.* **Mentored research.** Preprint: Research Square: doi 10.21203/rs.3.rs-636167/v1.

7. A. Rădulescu, R. Jacobowitz, A. Noel. *Are socio-economic factors relevant to lead contamination of drinking water in Hudson Valley school districts?*

8. E. Kaslik, M. Neamțu, A. Rădulescu. *Hopf bifurcation analysis in a model of system degeneration in schizophrenia.* Invited submission to *MDPI Mathematics*. In progress.

9. A. Rădulescu, R. Halpern, C. O'Riordan. *A model of predation and survival in a system of three interacting species.* **Mentored research.** In progress.

10. K. Larripa, A. Rădulescu, D. Schmidt. *Interplay between metabolism and immunity in tumoral microenvironment.* Collaborative research supported by a two week visit at the Mathematical Sciences Research Institute, Berkeley. In progress.

11. A. Rădulescu, T. Lundgren, J. Chipkin. *Modeling the interaction of poverty and crime in urban environments.* **Mentored research.** In progress.

12. A. Rădulescu, N. Cartwright, D. Evans. *Universality of synchronization properties in dynamic networks.* In progress.

13. A. Rădulescu, Y.L. Ko, A. Scimemi *Hodgkin-Huxley network dynamics in a striatum model of obsessive compulsive disorder.* In progress.
